

## INSPECTIONS

Inspections are made at various stages of the building project to assure compliance with adopted building and fire codes. If discrepancies are found by the inspector(s), they are noted on an inspection correction form and left on the job site. Upon making the necessary corrections, a follow up inspection will be required to document compliance has been accomplished. List of Inspection Requirements:

- Setbacks (property lines must be identified)
- Footings
- Construction meter
- Rebar (forms must be set and steel in place)
- Damproof
- Perimeter Drain pro
- Electrical Groundwork (call before covering conduit or cable in trench)
- Plumbing Groundwork (call before pouring slab or backfill)
- Electrical Rough-in (call when all boxes, wires, staples and panels are in place)
- Plumbing Rough-in (call when all rough plumbing is complete including traps, etc.)
- Mechanical Rough-in (call when all rough ductwork vents and flues are in place)
- Above-ceiling Mechanical (call when ceiling grid is in place but before ceiling tiles are in)
- Above-ceiling Electrical (call when ceiling grid is in place but before ceiling tiles are in)
- Gas Pressure Test (call when gas piping is complete and under a 10 PSI test for 15 minutes)
- Rough Frame (call when all of the above inspections are complete, when all framing is complete and building is dried in with shingles and windows installed)
- Permanent Meter
- Structural Floor
- Insulation
- Drywall for fire rated construction, (call when drywall is installed but not taped.
- Sewer Service
- Water Service

Final Inspections (call only when unit is ready for occupancy and every item is complete inside and out.)

- Final Plumbing
- Final Electrical
- Final Mechanical
- Final Building

*Note: Rough-in framing and final building will not be signed off until the plumbing, electrical, and heating work has been approved.*

Specialized Inspections:

- Re-roof
- Air Conditioning
- Furnace
- Water Heater
- Final Fire Department

## TO SCHEDULE AN INSPECTION

1. Inspections must be called in before 3:00 p.m. to receive a next-day inspection. Requests received after 3:00 p.m. will be scheduled for the second next working day.
2. Call Teri Thomas at 720-371-0719 with the following information:
  - Permit number
  - Job site address
  - Type of inspection requested
  - Concrete pour time, if applicable
  - Phone number of owner/contractor
  - Requested date of inspection
3. The building permit card must be posted on the job site at the time of the inspection.
4. Approved stamped plans, including foundation and truss designs, must be on the job site for all inspections.
5. Work shall not proceed until the inspector has approved the inspection by signing the building permit card.
6. Unauthorized covered construction may result in material removal, or require that an engineer write a letter stating that the work was performed in compliance with the adopted building codes.
7. Permits become null and void if the authorized work is not ready for the first inspection within 180 days of the issue date shown on the permit.
8. Permits become null and void if more than 180 days elapses between inspections or if work substantially ceases on a project.
9. All concrete reinforcing steel must be in place before an inspection is made.
10. Lot corners must be clearly staked for setback inspections.
11. Failure to request final inspections and meet all applicable conditions will prohibit the issuance of a C.O.
12. A re-inspection fee may be assessed when inspections are requested prior to the work being ready, if the permit card is not posted, if the approved plans are not available on the job site, or when access is not provided for the inspector. No further inspections will be made until the re-inspection fee is paid.
